City of Seneca Building Codes

2009 Energy Code Checklist For Residential Construction

(Required for all New Single-Family and Multi-Family Dwellings, Additions and Renovations)

The State of South Carolina has adopted the 2009 International Energy Conservation Code (IECC), which goes into effect beginning January 1_{st} , 2013. This form is required to be filled out and submitted prior to issuance of the Certificate of Occupancy.

Project Address:				Permit #
Builder:				License #
Phone:	Email:			Date
Project Type: Single-Family Dwellin	g 🗌 Townhome	Duplex	Addition	Renovation

Required Documentation:

- 1. Energy Compliance Choose One method. All methods must meet the Mandatory Requirements (2).
 - **Prescriptive** Includes Mandatory Requirements (2), Prescriptive Requirements (3) and Energy Certificate (4).
 - Trade Off Includes Mandatory Requirements (2) and Energy Certificate (4). Attach Rescheck Documentation to show compliance. Go to: www.energycodes.gov/rescheck (It's easy and free)
 - Performance Includes Mandatory Requirements (2), Energy Certificate (4). Attach documentation to show compliance. Documentation must include standard reference design and proposed design.
- 2. **Mandatory Requirements** Building envelope air tightness and insulation installation shall be demonstrated to comply with the following.

Mandatory Requirements

1. Building Thermal Envelope (402.4.1) limit infiltration.	Complied		
	- Building envelope air tightness and insulation shall be the following options - CHOOSE ONE		
Blower Door Test – Individual p Certified	Complied	N/A	
Air leakage is less than (7) seven			
Test Performed By:			
Address:			
Date Test Was Performed:			
HERS Certified			
To locate a certified professional	<u> </u>		
log onto:	http://www.resnet.us/trade/home-energy-raters-hers-raters http://www.bpi.org/		
<u>Visual Inspection</u> – Building envelope tightness and insulation inspection shall be considered acceptable when items listed in Table 402.4.2 are field verified.		$\Box \frac{\text{Complied with}}{\text{Table 402.4.2}}$	N/A
_			

Mandatory Requirements - Continued	Print Fo	rm
3. Fireplaces (State Amendment) Wood burning fireplaces shall have tight-fitting flue dampers and outdoor combustion air.	Complied	N/A
4. Fenestration Air Leakage (402.4.4) – Windows, sliding glass doors, skylights < 0.3 cfm/sf	Complied	N/A
5. Fenestration Air Leakage (402.4.4) – Swinging Doors < 0.5 cfm/sf	Complied	N/A
6. Recessed Lighting (402.4.5) – IC Rated, Sealed w/ Gasket or Caulk and Air Tight	Complied	N/A
7. Heating/Cooling System Controls (403.1) – Programmable Thermostat Required	Complied	N/A
8. HVAC Duct Sealing (403.2) – All ducts sealed with approved material	Complied	N/A
9. HVAC Duct Tightness Testing (403.2.2) ⁻ CHOOSE ONE Note: Individual performing test is required to be HERS or BPI Certified. □ Post Construction Test – Leakage to outdoors less than or equal to 8 cfm per 100 sf of conditioned floor area or a total leakage of less than or equal to 12 cfm per100 sf of conditioned	Complied	N∕A
 floor area at a pressure differential of 25 pascals. Includes Manufacturer's Air Handler Enclosure. Rough_In Test - Totalleakage is less than or equal to 6 cfm per 100 ft2 of conditioned floor area at a pressure differential of 25 pascals including Manufacturer's Air Handler Enclosure. If Air Handler is not installed, total leakage shall be less than or equal to 4 cfm per 100 ft2. Test Performed By: 	Complied	□ N/A
Address:		
Date Test Was Performed: HERS Certified BPI Certified		
10. Building Cavities (403.2.3) - Building framing cavities shall not be used as supply ducts.	Complied	∏ N/A
11. Mechanical Piping Insulation (405.5) – K5 Minimum	Complied	IN/A
12. Circulating Hot Water System (403.4) – Piping insulated R2 minimum	Complied	N/A
13. Mechanical Ventilation (403.5) – Outdoor air intakes/exhaust require dampers.	Complied	N/A
14. Lighting Equipment (404.1) - 50% of the bulbs installed in permanent lighting fixtures shall be high efficiency (CFL's, LED's, etc.)	Complied	□ N/A
15. HVAC Equipment Sizing (403.6) – HVAC equipment shall be sized based on building loads calculated in accordance with ACCA Manual J.	Complied	N/A
Builder Signature: Date:		

3. Prescriptive Requirements

Minimum Fenestration, Insulation and Energy Requirements (Climate Zone 3)				
Fenestration U-Factor	0.50	Windows, Opaque Doors, Glazed Doors U = Thermal Transmittance Factor	Complied	N/A
Glazed Fenestration SHGC	0.30	SHGC = Solar Heat Gain Coefficient	Complied	N/A
Skylight U-Factor	0.65		Complied	N/A
Ceiling Insulation	R30		Complied	N/A
Exterior Wood Frame Wall	R13		Complied	N/A
Floor Over Un-Conditioned Space	R19		Complied	N/A
HVAC Ducts in Attics	R8	R6 required in unconditioned basements and crawl spaces	Complied	N/A
Conditioned Basement Wall	R 5/13	R5 Continuous or R13 Cavity	Complied	N/A
Mass Wall	R 5/8		Complied	N/A
Crawl Space Wall (Closed)	R 5/13	R5 Continuous or R13 Cavity	Complied	□ N/A
Slab on Grade Floors	0	R5 For Heated Slabs on Grade	Complied	N/A
Cold Formed Steel Framing	Table 402.2.5	Cold Formed Steel Framing R Values meet the requirements of Table 402.2.5		N/A
Access Hatches and Doors - Doors from conditoned to unconditioned spaces shall be weather stripped and insulated.			Complied	N/A
Builder Signature:			Date:	

4. Energy Certificate – This form is required to be filled out complete and posted on or in the electrical panel box.

Energy	Efficiency Certificat	te

THIS CERTIFICATE SH OR IN THE ELECTRICA		Y POSTED (

AFUE = Annual fuel utilization efficiency. Standard measurement of efficiency for gas and oil-fired furnaces. (*Minimum Efficiency of 78% Required*)

COP = Coefficient of Performance

EF = Energy Factor

- **SHGC =** Solar Heat Gain Coefficient
- **SEER** = Seasonal Energy Efficiency Ratio is a measure of the cooling efficiency of your air conditoner or Heat Pump. (*Minimum 13 SEER Required*)
- HSPF = Heating Seasonal Performance Factor is a measure of the heating efficiency of a heat pump. (*Minimum 7.7 HSPF Required*)

Print Form

Table 402.4.2 identifies the items required to be field verified if "**Visual Inspection**" is checked under the Mandatory Requirements (Item #2)

Print Form

Table 402.4.2			
	Complied N/A	Exterior thermal envelope insulation for framed walls is installed in substantial contact and continuous alignment with building envelope air barrier.	
Air Barrier and Thermal Barrier	Complied N/A	Breaks or joints in the air barrier are filled or repaired.	
All Daniel and mennal Daniel	Complied N/A	Air permeable insulation is not used as a sealing material	
	Complied N/A	Air permeable insulation is inside of an air barrier	
Ceiling/Attic	Complied N/A	Air barrier in any dropped ceiling/soffit is substantially aligned with insulation and any gaps are sealed.	
	Complied N/A	Attic access (except unvented attic), knee wall door, or drop down stair is sealed.	
Walls	Complied N/A	Corners and headers are insulated.	
	Complied N/A	Junction of foundation and sill plate is sealed.	
Windows and Doors	Complied N/A	Space between window/door jambs and framing is sealed.	
Rim Joists	Complied N/A	Rim Joists are insulated and include an air barrier.	
Floors (Including above-garage and cantilevered floors)	Complied N/A	Insulation is installed to maintain permanent contact with underside of subfloor decking. Air barrier is installed at any exposed edge of insulation.	
Crawl Space Walls	Complied N/A	Insulation is permanently attached to walls.	
(Closed Crawl Space)	Complied N/A	Exposed earth in unvented crawl spaces is covered with a Class I vapor retarder with overlapping joints taped.	
Shafts, Penetrations	Complied N/A	Duct shafts, utility penetrations, knee walls and flue shafts opening to exterior or unconditioned space are sealed.	
Narrow cavities	Complied N/A	Batts in narrow cavities are cut to fit, or narrow cavities are filled by sprayed/blown insulation.	
Garage Separation	Complied N/A	Air sealing is provided between the garage and conditioned spaces.	
Recessed Lighting	Complied N/A	Recessed light fixtures are air tight, IC rated, and sealed to drywall. <i>Exception: Fixtures in conditioned space</i> .	
Plumbing and Wiring	Complied N/A	Insulation is placed between outside and pipes. Batt insulation is cut to fit around wiring and plumbing, or sprayed/blown insulation extends behind piping and wiring.	
Shower/Tub on Exterior Wall	Complied N/A	Showers and tubs on exterior walls have insulation and an air barrier separating them from the exterior wall.	
Electrical/Phone Box on Exterior Wall	Complied N/A	Air barrier extends behind boxes or air sealed type boxes are installed.	
Common Wall	Complied N/A	Air barrier is installed in common wall between dwelling units.	
HVAC Register Boots	Complied N/A	HVAC register boots that penetrate building envelope are sealed to subfloor or drywall	
Fireplace	Complied N/A	Fireplace walls include an air barrier.	

Table 402.4.2 is not required to be submitted to the Community Development Department but is to be used as a checklist to field verify the items as noted.
